

Presentation 1: Take online workshop in SaS, Install SaS, Programming in SaS

SaS is an industry standard for data analysis and mining. Most major companies require certification in SaS programming. It is essential for your future employment as a data scientist to know this programming environment.

In this project you are supposed to do the following:

- 1) Install the University Version of SaS. In this file there are guidelines for installing it in Windows and Linux operating systems.
- 2) Take the online workshop following the link
<https://support.sas.com/edu/elearning.html?ctry=us&productType=library>
- 3) Run a multiple linear regression example with SaS
- 4) Prepare a power point presentation for the installation and programming in SaS.
