Lab 2: Understanding your data

Read and implement chapter 2 of the book "Linear Regression using R". The data used and the R code for reading the data in R are included in the Lab 2 file.

You will submit:

1) an R notebook that will include all the text of the chapter 2 using the markdown language style including tables.
2) An html and pdf of the R notebook including the output of each r-chunk

The above files will be uploaded in the dropbox file share "PSE Data Science Fall 2017". Athanasios Zoumbekas (the official assistant to the course) will send you instructions.
